Mathematics For Science

By H.M. Humphreys, S.M. Uppal

New Age International (P) Limited, 2013. Softcover. Book Condition: New. 5th or later edition. The text book has been primarily prepared to meet the needs of a student who is studying Mathematics in the first year of a University course in various disciplines. It is hoped that most of the topics required by such a student in the first year of study will be adequately covered. At the same time it is hoped that the material will provide a good foundation for the student who plans to do more specialised work in university mathematics, especially in the subjects physics, chemistry and mathematics itself. Some or all of the topics may also be useful to students who are preparing to join an undergraduate course in university or who are taking various college diploma courses in Engineering, Agriculture and other related disciplines. The chapters aim to cover most of the topics which a student will need at an introductory level in statistics, probability, algebra, trigonometry, coordinate geometry and calculus at university level. All efforts have been made that the subject matter in each Chapter flows in a natural way. The concepts have been explained in a very lucid way. The problems have...

Reviews

The ebook is great and fantastic. We have read and i also am sure that i am going to likely to go through once again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Erica Turcotte

It in a single of my personal favorite publication. It usually fails to charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.
