Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x5 mm. This item is printed on demand - Print on Demand Neuware - Over the past 40 years a collective form of systems development has evolved on the electronic networks of the world. In the wake of the information technology revolution has come a proven method for developing, deploying and maintaining these systems. This method, developed under the auspices of Department of Defense research grants, has resulted in the most successful and reliable software in existence. This method, based on collective intelligence, peer review and functional evolution, has rippled through the world of Information Technology. It depends on the uninhibited distribution of the currency of this realm: the source code, documentation and data which are the building blocks of these complex systems. The release of source code is commonly called open source licensing. The release of electronic information is known as open content licensing. Together, they comprise Open Licensing. There are significant gains to be realized through the formal adoption, support and use of open licensed systems by the Department of Defense. Secondary gains may be made in the morale and retention of Airmen involved in information technology. This adoption can take place at any point in the acquisition cycle and can even benefit deployed and operational systems. The benefits include reduced acquisition, development, maintenance and support costs and increased interoperability among our own systems and those of our Allies. 78 pp. Englisch.
