Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Pulp and Paper: And Other Products From Waste Resinous Woods The idea that the waste long-leaf yellow pine, Norway pine, Douglas fir, and other woods rich in resins can be used for the making of paper, wood turpentine, rosin oils, and similar products is not new, but the industry is just beginning to develop. It has received more or less attention in this bureau during the past seven years, where information as to its feasibility and practicability and as to the yields and character of the products which may be made has been gathered. This information points the way to the means whereby valuable timber may be conserved and the menacing waste wood of the lumbering operations may be profitably utilized. The making of paper from these woods presents no unusual difficulties; in fact, several mills are running almost exclusively on such woods, while others use them in greater or less quantity. The recovery of wood turpentine, pine oils, and other products from resinous woods by steam or destructive distillation has been fairly well worked out, and, when a plant is properly located and equipped and operated skillfully, this industry is proving profitable. The production of rosin oils, tars, and pitches from common rosin is also a thoroughly established, well-understood, and profitable industry. With these successful results in view, it is at once clear that a combination of the three industries, using waste wood as the raw material from which all the products of these industries may be made, should be more profitable and require less capital, equipment, and labor than the three when conducted separately. Since each of these industries, paper-making, wood distillation, and...
