

A Guide to Climate Change Lunacy: Bad Forecasting, Terrible Solutions (Paperback)

By Mark Lawson

Connor Court Publishing, Australia, 2012. Paperback. Book Condition: New. 210 x 148 mm. Language: English . Brand New Book ***** Print on Demand *****.Activists and even some scientists will tell you that the science behind the expected major warming of the globe is rock solid. In fact, the projections of temperature increases in coming decades are based on entirely unproven forecasting systems which depend on guesses about crucial aspects of the atmosphere behaviour and the all-important oceans. In addition, these forecasts use carbon dioxide emission scenarios that have been generated by economic calculations rather than from science, and parts of which are already hopelessly wrong less than a decade after they were made. As Mark Lawson explains in this book, in layman s language, this lunacy has been compounded by further forecasts based on these already deeply flawed projections and combined with active imaginations, to produce wild statements about what will happen to plant, animal, bird and marine life, as well as coral reefs, hurricanes, sea levels, agriculture and polar ice caps. The books shows that these projections are little more than fantasy. On top of all this lunacy activists, aided and abetted by some scientists, have proposed a range...
