Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Are you interested in learning about a disease that effects a lot of people but is relatively untreated? Human body is made of number of numerous small and big organs that work together as a system. Each of these organs plays a specific role in the body and operates in co-ordination with other systems. When all of these parts function properly, a person is healthy and fit. There are several factors that determine how healthy a person is, but the most important factor is the food he eats. What goes into the stomach of a person directly influences how he feels and how it affects the body. So, it is not surprising when somebody says that health of the gut determines the overall health of the body. With the progress of medical science, there is diagnosis and cures available for some of the most life threatening diseases. But, some discussions and conditions are still under debate in the medical community; one of them is whether Leaky Gut Syndrome exists or not. Though opinions over it a divided, and so are ways in which it can be treated, awareness about Leaky Gut Syndrome is growing slowly.
