By the practical study of representative forms, exemplifying the leading modifications of plant and animal life, the student obtains a basis of distinctly observed fact with which to compare other forms, and round which to cluster the information derived from books. The University of London has given practical shape to this idea by selecting a series of common types which each candidate must be prepared to examine microscopically, to dissect and to describe. In the triple alliance, as it may be called, of description, drawing, and object, is found the easiest, safest, and surest means of successful study. Not only is the Atlas a guide to practical work, but since it contains the results of that work in a permanent form, a glance at the drawings with their accompanying description will serve as a valuable refresher to the memory before going up for examination. Further, the Atlas may be used with any of the Text-books of Zoology or Botany in common use, such...
